

HI-SCAN 100100V

Heimann X-ray Inspection System

Feature Highlights

- Universal X-ray system for largest variety of item dimensions
- Excellent image presentation due to optimal X-ray geometry
- Outstanding image quality with new HiTraX electronics
- Wire detectability AWG 38
- HI MAT^{Plus} technology for better material discrimination
- Tunnel size in optimal proportion to entire system
- Optional: High resolution option for AWG 39

The *HI-SCAN 100100V* is specifically designed to meet the needs and applications of airports, customs facilities, transportation operations, carriers, parcel services or wherever high security and total screening of a large variety of dimensions is required.

The *HI-SCAN 100100V* is a compact X-ray security screening system with tunnel dimensions of 1000 mm width by 1000 mm height. It permits the inspection of bulky as well as small items without any loss of X-ray image quality.

For application requiring a better wire recognition, a high resolution detector line is available as an option, allowing for AWG 39.
