OPENGATE™

AUTOMATIC SCREENING of PEOPLE with LUGGAGE, BACKPACKS, and BAGS for MASS CASUALTY METAL THREATS DETECTION

THREAT DETECTION THROUGH ELECTROMAGNETICS

Introducing OpenGate™

OpenGate is a **Revolutionary Weapons Detection System** designed for the automatic screening of people in transit, including their luggage, backpacks, and bags, for the detection of **Mass Casualty Metal Threats**, such as high caliber assault weapons and IED devices, up to full size handguns.

✔ OpenGate is a state-of-the-art wire-free, screening portal consisting of **two independent and self-powered pillars**, with each pillar equipped with a support base and electronic analysis system.

✔ Contrary to other solutions, **OpenGate does not require a mechanical and electrical connection** between the two transducers that define the passageway, therefore there is no tripping hazard or barrier for wheelchairs or other mobility items.

✔ **Acoustic and optical signals**, located at the top of the pillars, provide simultaneous status and alarm indications.

✔ **OpenGate features a near zero rate of nuisance alarms**, and operates with **very high transit flow**, without the need for the divestiture of non-threat items.

✔ It is **portable, elegant, easy to set up and ready to use with no installation required**, including the setting and assembly of mechanical and electrical parts.

✔ Its structure makes it **suitable for indoor and outdoor operations**, even in conditions of exposure to rain and sunlight, in all environmental conditions that are compatible with security screening operations.

✔ The **extreme portability allows quick relocation of the gate**, offering the most suitable solution for places where, for safety reason, the checkpoint must be moved from obstructions after use.

✔ If required, the **detection and signaling parameters can be easily set via the OpenGate App**, designed for smartphones or tablets based on Android or iOS operating systems.

OpenGate™ — HIGHLIGHTS

- **DETECTION TARGET**

  High caliber assault weapons and other large mass casualties metallic threats

- **OPERATIONAL USE**

  Extremely high throughput with near-zero nuisance alarms, provides automatic screening and pre-screening of non-divested people along with their carry-on items

- **APPLICATIONS**

  Applications include metro and railway stations, airport and port terminal entrances, convention centers, museums, stadiums, arenas, theaters, theme parks; in general all places open to the public characterized by high access flow, in continuous or limited in time

- **EASY TO RELOCATE AND QUICK TO INSTALL**

  Is only 25 pounds with less than 1 minute setup and does not require adjustments or the assembly of mechanical and electrical parts

- **INDOOR AND OUTDOOR OPERATIONS**

- **READY TO SHIP NOW**

- **FURTHER DATA AND SYSTEM DEMOS AVAILABLE UPON REQUEST**

OpenGate™ — HIGHLIGHTS

Detection and signaling parameters can be easily set via the OpenGate App, designed for smartphones or tablets based on Android or iOS operating systems.

✔ **OPERATIVE SCREEN**

✔ **IS SETTING**

- **TRANSIT WITH ALARM**
  The red lights turn on completely red. Sounder: ON

- **EASY TO RELOCATE AND QUICK TO INSTALL**
